IGI LABORATORY GROWN DIAMOND GRADING REPORT

August 19, 2019

IGI Report Number LGM3E54297

Shape and Cutting Style ROUND BRILLIANT

Measurements 9.35 - 9.41 x 5.79 mm

GRADING RESULTS

Carat Weight 3.08 CARATS

Color Grade

Clarity Grade VS 1

E

Cut Grade IDEAL

ADDITIONAL GRADING INFORMATION

Polish EXCELLENT

Symmetry VERY GOOD

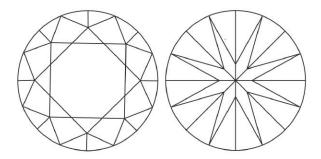

Fluorescence NONE

Inscription(s) LABGROWN IGI LGM3E54297

Comments:

This High Pressure High Temperature (HPHT) laboratory grown diamond described above is classified as Type IIa.

The Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded, and Las-Richibed® by International Gemological Institute (IG). A LGD has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product), LGD's are typically produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post-growth modifications to change the color. IGI utilizes the most advanced techniques and equipment currently available including, binocular microscopes, cliamond color masters, non-contact-optical measuring devices, a wide range of analytical techniques including FIIR, UV-VIS-NIR, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features this Report is neither a guarantee, valuation nor appraisal and by making this report IIGI does not agree to purchase or replace the article.
